Portfolio | LinkedIn | GitHub

PROFESSIONAL PROFILE

Software developer focused on AI Engineering, with professional experience in financial security backend systems and hands-on work with generative AI, agents and automation. I build solutions using LLMs, RAG, APIs and MCP tools, combining Python/FastAPI with databases, service integrations and sound engineering practices.

TECHNICAL STACK · HANDS-ON EXPERIENCE IN PROJECTS AND TESTING

GENERATIVE AI & AGENTS · LLMs, LangChain, LangGraph, RAG, pgvector, MCP, tool calling, prompt engineering, OpenAI API, Anthropic SDK, Gemini, LM Studio.

ML & COMPUTER VISION · Hugging Face, fine-tuning / LoRA, PyTorch, TensorFlow, OpenCV, YOLO.

DEVELOPMENT & DATA · Python, FastAPI, Java, Spring Boot, REST APIs, SQL, PostgreSQL, Supabase, React, Angular, Kotlin.

CLOUD & DEVOPS · AWS, Google Vertex AI, Docker, Terraform, Git/GitHub, GitHub Actions, CI/CD.

AUTOMATION / RPA · n8n, UiPath, Blue Prism, Power Automate, webhooks, workflows and process automation.

PROFESSIONAL EXPERIENCE

Backend Developer | Rewire Holding LTD

Feb 2026 – Jun 2026

- **Backend development and maintenance (Java / Spring Boot) for RH360, a financial platform with authentication,** security and fraud prevention requirements.
- **Consolidated services and shared libraries, reducing duplication and incidents; estimated 45% reduction in** maintenance effort.
- **Contributed to improvements in Python-based facial recognition modules for banking security solutions.**

Software Developer & AI Automation | Freelance

Jan 2026 – Aug 2026

- **Developed Avisia.es, a SaaS platform automating real estate lead acquisition and qualification through** integrations, APIs, webhooks and n8n workflows.
- **Built applications and AI integrations for personal and client projects; developed a mobile app tailored to** the operational needs of a local gym.

Aerospace Technician | DHV Technology

Jul 2026 – Present

- **Verified and quality-checked components for space-grade solar panels in a high-precision environment.**

PERSONAL AI & AUTOMATION PROJECTS

Komea | AI-powered Android app. Gemini-assisted recipes, OCR for receipts/products, ML Kit translation and Supabase backend.

Android Engineering Skill | Development agents. Skills, procedures and validation for coding assistants covering Android programming, architecture, testing and security.

Local agents & computer vision | Prototypes. MCP integrations, RAG and local models; exploration of camera-based gesture and facial signal analysis.

EDUCATION

Higher Technician in Multiplatform Application Development (DAM) | 2024–2026

Technician in Microcomputer Systems and Networks (SMR) | 2022–2024

Spring Framework 6 & Spring Boot 3 · Udemy (65 h) | February 2026

LANGUAGES

Native Spanish · English B1

AVAILABILITY

Malaga · On-site / hybrid / remote · Driving licence and own vehicle · Available to travel.
